Philip Huynh

Chicago, IL | 4043435392 | philiphuynhga99@gmail.com | https://github.com/xler985

Objective

- I wish to produce software and tools that allow me to challenge myself, both technically and creatively, within the industry.

Education

Bachelor's in Computer Science | Georgia Institute of Technology

- Graduated with Honors
- Extracurriculars included 3+ Years in the Urban Honeybee Project and 3+ Years in WREK Radio, including the executive position of Public Service Director

Skills & Abilities

Languages & Libraries

- Proficient in Java, JavaScript, C, Python with experience in React, SQL, Spring Boot, and REST APIs

Technologies

- Familiar with Visual Studio Code, IntelliJ, NetBeans and Android Studio
- Well versed with Version Control Systems such as Git, GitHub, as well as corporate repositories
- Practiced with Adobe Suite (XD, Photoshop, and Premiere)

Experience

Wiley (JPMC) | Production Support Analyst | 1/22 - 1/23

- Working onsite as a contractor for Wiley at JP Morgan Chase under the Commercial Card Fraud team
- Apply technical and analytic skills to support multiple internal applications as well as manage a SRE team as scrum master.

Software Developer Internship | Fiserv Inc. | 6/20 – 8/20

- Utilized mentorship and company resources to create a microservice for commerce retailers (Chipotle, etc.), specifically to save security keys for encrypted client transactions
- Utilized Java, Spring Boot framework and RESTful API to create this microservice
- Microservice was successfully developed, and was eventually deployed within Fiserv's clients

Financial Learning Curriculum System| Georgia Tech College of Computing | 1/20 – 6/20

- Collaboratively developed the Georgia Tech Financial Learning Curriculum online quiz platform to provide Georgia Tech students with information on financial related issues
- Utilized Typescript, React, and Adobe XD to develop this platform
